1. Item Type & Exclusive Brands Support

VallenIQ will now display a new Item Type field that will help determine if items are core to Vallen or not. This will help guide users the opportunity to select an item from a strategic exclusive brand or core vendor.

Previously in VallenIQ, there was no clear indicator for SX.e part numbers to display their importance for quoting and sourcing. This new indicator will display whether the item is an exclusive brand, core plus, core, etc.

This new field will display in each line item's Expanded View, Suggestions, and Advanced Search results screens to allow users to select these parts over similar parts that are from non-core vendors.

In addition to the new Item Type field, we've now included specific support for Exclusive Brands items in VallenIQ.

Users will now be able to see Exclusive Brands suggestions in a new dedicated suggestions tab, load them into their line items, and use them as alternates.

1.1 Item Type

1.1.1 Item Type Values

One of four Item Types will appear in VallenIQ:

- EB: Exclusive Brands
- CP: Core Plus
- C: Core
- NC: Non-Core

2. Group Edit - Set Usage & Requested Quantity

VallenIQ now has a new feature in Group Edit titled Set Usage & Req. Qty. This feature can be used to update usage values, as well as requested quantities, for multiple line items at a time.

2.1 New Modal

To use this feature, first select one or more line items using the selection box located in the leftmost column of the main project page, then select the new Set Usage & Req. Qty option:

VallenIQ will display a new modal where users can update Customer Usage values and Requested Quantity values:

A screenshot of the 'Set Usage & Req. Qty' modal. It has a title bar with a close button. The form contains a 'Customer Usage' section with a text input field labeled 'Usage'. Below this are four 'Quantity' sections, each with a text input field labeled 'Qty 1', 'Qty 2', 'Qty 3', and 'Qty 4' respectively. At the bottom, there are 'Confirm' and 'Cancel' buttons.

2.2 Error Handling

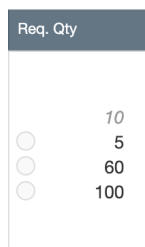

When updating Quantity values in this pop up, quantities must be updated in order.

This means that VallenIQ will not allow users to update Requested Quantity 2 before updating Requested Quantity 1 and so on and so forth.

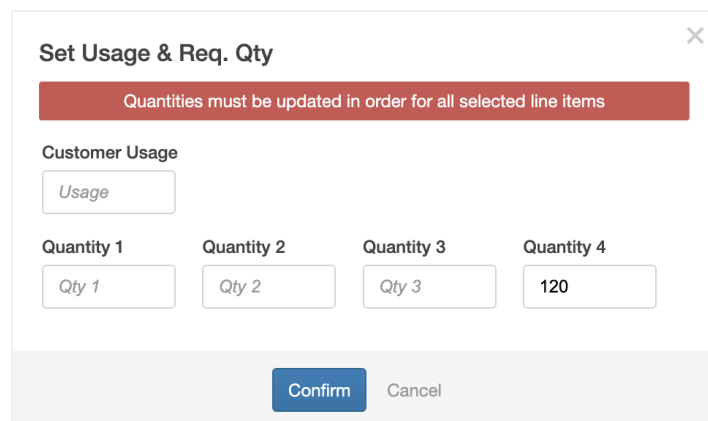

For example, if you have a scenario where two line items are selected, and selected line item 1 has two Requested Quantities (note that the italicized 10 is the usage value, which does not count towards the Requested Quantities):

And selected line item 2 has three Requested Quantities:

VallenIQ will not allow you to update Requested Quantity 4, because selected line item 1 does not have Requested Quantity 3 populated:

2.3 Permissions

The following are the permissions for the new Group Edit - Set Usage & Requested Quantities feature:

- **Super Admins & Admins:** Can edit both Customer Usage and Requested Quantity breaks
- **Specialists:** Cannot edit Customer Usage field, but can edit Requested Quantity breaks for line items they are assigned

3. Edit Usage At Line Item Level

Super Admin and Admin users are now able to edit the Usage field in the Requested Quantity modal at the line item level.

To edit Customer Usage at the line item level, select the Requested Quantity cell:

Ref #	Req. Part #	Req. MFR/VEN	Quoted Part #	Vallen MFR/VEN	Avail. Qty	Req. Qty	Unit Price	Quote Price	Cost
1 JMK2	RPN 1152415 LAST PICK	NO MFR NO VENDOR	MPN 1152415 VALLEN PN 504674103233 VENDOR PN 1152415 EXACTEK O HSS SML 1 35 SP BLK OX UOM EA <small>• Suggested Parts • Last Picks • Updated Parts</small>	MFR GREENFIELD INDUSTRIES CODE 451984 VENDOR WEILER CORPORATION CODE 12382 <small>• Mfr Notes • Vendor Notes</small>	—	<div>10 5 60</div>	\$4.58000	<div>4.58000 Set</div> <div>4.58000 Set</div>	<div>REPLACEMENT COST \$2.85000</div> <div>RSG SC BPC OH OH</div>

Then update the value in the Customer Usage field and select Save:

Update Quantity

Customer Usage

[Save](#) [Cancel](#)

However, VallenIQ will not let Specialist users edit the Customer Usage field. They will only be able to edit the Quantity 1-4 fields for line items they are assigned.

4. Group Edit - Clear Line Items Updates

In this release, we've made adjustments to Group Edit - Clear Line Items that improves usability of the feature.

4.1 Location In Group Edit Dropdown

Clear Line Items has been moved to the last option in the Group Edit dropdown to prevent users from accidentally selecting this feature.

4.2 Confirmation

When Clear Line Items is selected, VallenIQ will now display a confirmation pop up that requires you to select Confirm in order to clear the contents of your selected line items.

Clear Line Items

×

Are you sure you want to clear the selected line item(s)?

Confirm

Cancel

This prevents users from accidentally clearing their selected line items when this action is not intended.

4.3 Update Status To TI

Lastly, when line items are cleared, the status of the selected line items will be changed to TI (To Be Identified):

Ref #	Req. Part #	Req. MFR/VEN	Quoted Part #	Vallen MFR/VEN	Avail. Qty	Req. Qty	Unit Price	Quote Price	Cost	Quote Cost	GP %	Extended Price	Status

5. Group Edit - Deselect All Confirmation

Similar to the Group Edit - Clear Line Items confirmation step discussed above, we've also implemented a confirmation step for the Group Edit - Deselect All feature as well.

When using this feature, VallenIQ will not deselect the line items you've selected:

Until you click the Deselect button in the pop up below:
