After the improvements we've made, the page should load faster and be more responsive as you configure and work on quotes.

2. Line Items Per Page Updates

We've updated the number of line items users can see per page in Project View. We changed the options for this feature because the more line items there are on the page, the slower the page performs.

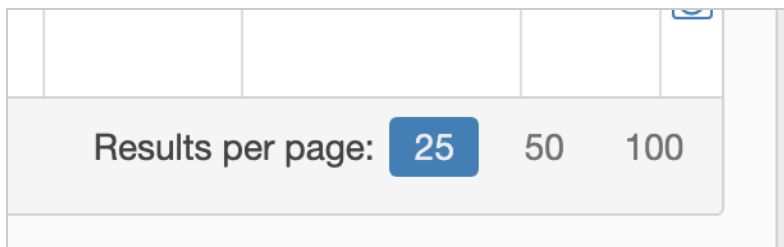

Previously, the line items per page options were:

- 125 (default)
- 250
- 500

We've updated these options to the following:

- 25 (default)
- 50
- 100

3. Refresh All Button Improvement

When VallenIQ is refreshing line items in your Projects, users will now be able to stop the refresh process by clicking the new “X” button to the right of Refresh All:

The screenshot shows the VallenIQ Project Management interface. At the top, there's a navigation bar with 'Dashboard', 'Project Management', and 'Settings'. Below this is a search bar and buttons for 'Upload Project', 'Create a New Project', and 'Advanced Search'. The main content area displays a table of 50 lines. The table has columns for Ref #, Req. Part #, Req. MFR/VEN, Quoted Part #, Vallen MFR/VEN, Avail. Qty, Req. Qty, Unit Price, Quote Price, Cost, Quote Cost, GP %, Extended Price, and Status. The table is filtered by 'Category (14)' and 'Req. Manufacturer (0)'. A 'Refresh All' button with a red 'X' icon is visible in the top right corner of the table area.
