

VallenIQ v1.41

January 22nd, 2026

1. PROs Pricing Indicator For Customers

A new visual indicator now displays below the customer name when working with customers that are enabled for PROs pricing.

This provides visibility for Vallen users into whether PROs pricing guidance is available for the selected customer in your project.

The screenshot shows a project page for '88352 PROS Pricing (2 Lines)'. The page includes a header with the project name, date, and owner. Below the header is a navigation bar with options like Settings, Header, Notes, Share, Edit History, and Custom Export. The main content area is divided into several sections: a customer profile for METALSA with a 'PROs Pricing Enabled' indicator (highlighted in a red box), project details (ID: 9114, Status: Open, Due Date: 2026/01/15, Team Lead: Bridget Fosback), and a filter section for categories (Maint Equip and Supplies, Safety Products). At the bottom, there is a status bar indicating 'Selecting 0 item(s)' and 'Showing 2/2 results'.

2. PROs Pricing Data Now Captured in VIQ Orders

Orders submitted through VIQ now include PROs pricing information when available. This ensures that pricing guidance provided during the quoting process is captured and passed through to SXe for downstream reporting.

There is no visible impact to the user interface of VallenIQ or the **Convert to Order** process in the Project View page, as this update occurs automatically in the background during order submission.
